

A booking wallchart right in the palm of your hand. Whether you're in a meeting, in a cab or on a flight, you can continue to enjoy our powerful resource planning solutions.

“Retain Mobile helps us be more efficient by reducing the amount of back and forth between our staff about planning.”

RETAIN MOBILE

RESOURCE PLANNING

Custom

In keeping with our commitment to flexibility, Retain Mobile is fully customizable. Using the Retain Security Manager, you can tailor the app depending on user profiles as you already do with our other products. This lets you truly take ownership and ensure Mobile meets your requirements.

Out of range?

Even when you're disconnected from a mobile tower, during air travel for example, updates made on Retain Mobile are queued up and synchronized automatically when wireless connectivity is restored.

Staying in touch

Great teamwork starts with great communication. Any changes made to the schedule are instantly available to colleagues. In a meeting, you can right then and there make a change request which a manager can respond to thus increasing productivity and letting you focus on what really matters.

Control

Administrators have an unprecedented amount of control over how to deploy the application to mobile users, with the highest level of enterprise scalability. For instance, you can set data exchange parameters to control bandwidth costs. You can make over-the-air changes seamlessly without interrupting users, or erase data from lost or stolen devices.

Founded in 1996, Retain International meets the needs of professional services firms in resource planning and talent management.

Consultants, auditors, lawyers and many other professionals in 65 countries rely every day on Retain's suite of products to ensure the optimal allocation of resources and assets.

The success of Retain reflects a unique practical approach to customers' needs combined with the best people and the latest technology that enables it to exceed every expectation. This is why Retain is trusted - among others - by the Big Four accounting firms on a global scale.

Retain offers products on various platforms such as Windows, a browser or a mobile device. In every case, customer's have complete control over their data. They also have the ability to customize many aspects of the software to meet their specific needs.

In addition to its flagship Wallchart product, Retain also provides add-ons such as a Retain Skills, a talent management solution which helps identify and track employee skills so that suitable training programs can be implemented to plug any gaps.

Retain International is a global organization with decades of experience integrating with leading Enterprise Resource Planning systems.

Retain International Ltd is a wholly owned subsidiary of Capita Plc.
