

Retain Mobile

Wallchart in the palm of your hand

Get a fully functional wall chart in the palm of your hand. Whether you're in a meeting, in a cab or on a flight, you can continue to utilise Retain's powerful resource planning solution with Retail Mobile.

Customised

In keeping with Retain's commitment to flexibility, Retain Mobile is fully customisable. Using the Retain Security Manager, the app can be tailored to your organisation depending on the user profile, as with the rest of the Retain Portfolio. This lets you truly take ownership and ensure Mobile meets your requirements.

Staying in Touch

Great teamwork starts with great communication. Any changes made to the schedule are instantly available to your colleagues. In a meeting, you can make a change request instantly, which a manager can respond to, thereby increasing productivity and letting you focus on what really matters.

Forming Orderly Queues

Even when you're disconnected from your network or wifi, during air travel for example, any updates made on Retain Mobile are queued and synchronised automatically when connectivity is restored. spreadsheet or CSV file.

Control

System administrators have an unprecedented level of control over the deployment of the application to mobile users, with the highest level of enterprise scalability. For instance, you can set data exchange parameters to control bandwidth costs. Over-the-air changes can be made seamlessly without interrupting users. Additionally, if a device has been lost or stolen, data can be remotely erased to ensure your security is maintained at all times.
